Open up your ears and listen... This is Evergreen's ninth student album project. Every track on this compact disc represents the dedication, hard work and talent of Evergreen students. Every production task involved in the creation of this CD, from the intensity of studio production, to the detailed art work layout, was done by students using campus facilities. This silvery disc is the end result, a 72 minute snapshot of artistic creation at The Evergreen State College, 1995. This is Evergreen at its best, so turn it on. Play it loud. We hope you like what you hear.
